PROFESSIONAL SUMMARY

Fullstack developer with 2.5+ years of experience building production-grade web and mobile applications end-to-end — from backend APIs and database design to frontend UI and cloud deployment. Proficient in Laravel and NestJS on the backend, React and Next.js on the frontend, with hands-on experience deploying via Docker on GCP. Demonstrated ability to deliver complex features including real-time WebSocket systems, OAuth 2.0 authentication, iOS mobile app, microservices architecture, and CI/CD pipelines. Strong communicator with a track record of working across the full stack on both product and enterprise software.

TECHNICAL SKILLS

Backend: PHP, Laravel, NestJS, Java Springboot

Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, shadCN, Tanstack Query, Jotai

Database: MySQL, PostgreSQL, stored procedures, schema design

DevOps & Tools: Docker, GCP, CI/CD, Git, GitHub, GitLab, Postman, Swagger, Keycloak

Mobile: Capacitor.js (iOS), App Store deployment

Architecture: REST API, MVC, Service-Repository Pattern, Microservices

Languages: Bahasa Indonesia (native), English (intermediate)

WORK EXPERIENCE

Fullstack Developer | PT. Altindo Teknologi Indonesia • *Hybrid* *Jun 2025 – Present*

- Led frontend development for a Transport Management System (TMS) using React.js, TypeScript, Tanstack Query, React Hook Form, shadCN, and Tailwind CSS — architected routing, state management (Jotai + React Context), and CI/CD pipeline on GCP.
- Improved frontend performance by implementing lazy loading, Suspense, and memoization, reducing initial load time.
- Contributed to microservices ERP system (Altitude ERP) using Java Springboot and Next.js — built Asset service module, set up Keycloak authentication, Spring Config, and service discovery.
- Integrated Nestjs and Reactjs with BC (Microsoft Business Central 365) as the main logic for ERP product.
- Created and maintained API documentation using Postman and Swagger.

Backend Developer | PT. Aneka Dasuib Jaya • *WFO* *Nov 2023 – Apr 2025*

- Built and maintained fullstack web and mobile applications including an iOS app deployed to the App Store using Capacitor.js, serving end users across multiple product modules.
- Designed and optimized relational database schemas (MySQL) and improved query performance significantly using stored procedures.
- Implemented secure authentication flows including Laravel Sanctum, OAuth 2.0 (Google), WhatsApp-based auth via Fonnte API, and role-based access control with Gates and Middleware.
- Integrated real-time data synchronization using WebSocket (Abyl), enabling live updates across the application.

Lab Instructor | Laboratorium Teknik Informatika Gunadarma *Nov 2019 – Sep 2021*

- Taught database and algorithm concepts to undergraduate students, covering SQL, data structures, and programming logic.
- Produced instructional video content on database management topics for coursework materials.
- Assessed and graded student assignments, providing written feedback to support learning outcomes.

PROJECTS

TMS (Transport Management System) – Indofresh

Dec 2025 – Mar 2026

- Sole frontend developer responsible for full architecture: built design system in Whimsical, implemented routing (React Router), caching (Tanstack Query), and state management (Jotai + React Context).
- Developed all UI modules using shadCN + Tailwind CSS and refactored codebase into reusable components and custom hooks.
- Set up CI/CD pipeline on GCP VPS and optimized performance with lazy loading, Suspense, and memoization.

Tech Stack: *TypeScript, React.js, NestJS, PostgreSQL, Tanstack Query, Docker, GCP, Vite*

JavaSuperfood Grosir

Dec 2024 – Apr 2025

- Built and deployed iOS mobile app to the App Store using Capacitor.js.
- Developed full authentication system: Laravel Sanctum, OAuth 2.0 (Google), WhatsApp-based login via Fonnte API, and role-based middleware with Gates.
- Integrated WebSocket via Ably for real-time data; optimized database with stored procedures; built core CMS modules.

Tech Stack: *PHP, Laravel 10, MySQL, React.js, TypeScript, Tailwind, Tanstack Query*

Freshco – Indofresh

Sep 2025 – Dec 2025

- Maintained vendor codebase, resolved bugs, and implemented new product features.
- Managed server infrastructure and deployment on GCP; integrated POS printer on backend; implemented reseller module on frontend.

Tech Stack: *Next.js, NestJS, PostgreSQL, Tanstack Query, Docker, GCP*

Altitude ERP – Microservices

Apr 2026 – Present

- Contributed to a microservices ERP system: built Asset service module with Java Springboot and Asset UI with Next.js.
- Implemented REST communication between services; set up Spring Config, API Gateway, service discovery, and Keycloak for centralized authentication.

Tech Stack: *Java Springboot, Next.js, Tanstack Query, PostgreSQL, Docker*

EDUCATION

Bachelor of Information Technology | Gunadarma University

2018 – 2022

GPA: 3.55 / 4.00
